### About Me

My name is Muhammed U, and I have been working as a freelance Flutter developer since 2023. Over the years, I have participated in various projects, including a Todo Application that enables users to add, edit, and delete tasks while also incorporating a group chat function using Flutter and Firebase. Additionally, I have worked on a Group Chat Application that bears similarities to popular messaging platforms like Whatsapp. These experiences have allowed me to hone my skills in Flutter development and work on diverse and exciting projects.
